

Who we are?

i-grow are an **innovative care and support company** that was started in 2012. We specialise in providing **personalised, outcome based care and support packages** to individuals in **Plymouth and the surrounding areas**.

What we do?

We **support** people in the **community** with a diverse range of needs and specialise in supporting vulnerable adults and adults with learning difficulties and physical disabilities.

We provide an **“enabling service”** to enable people to do the activities they want to do in the community. We support individuals to do a variety of activities all across Plymouth.

We provide **“supported living”** packages and believe in supporting people to live as independently as possible in the homes and communities of their choosing.

We also have an accessible, modern **“day centre”** in Plymouth City Centre which is open Monday to Friday 9:30-15:30

All our packages are fully tailored to the Service Users requirements and our staff are **matched** with Service Users to ensure they get the best experience in the activities and support that they receive.

We provide support to Service Users during the day, evening, nights and weekends. Our shifts typically range from **4 hours to 12 hours**.

Although we provide personal care where required during our shifts we are not a domiciliary care agency.

What we are looking for?

We are looking for people who want to make a **positive difference** to peoples lives.

We want **enthusiastic, proactive, caring and professional individuals** to be our support workers and represent our company out in the community.

We want people who can work on their own and as part of a **team**.

Why work for us?

We provide comprehensive training and supervision packages to all our staff with opportunities for **career progression**.

We offer **competitive wages** and **guaranteed hour contracts** for part time and full time support workers.

We create an environment to **fully support** our staff and as a result we have **motivated staff** who enjoy and are **proud** of what we have created at i-grow.

We create rotas with cloud based software which allows us to **rota four weeks in advance** to provide people with the security and stability they need in their lives.

We are a **flexible** company that meets the **needs** of our clients and our employees.
